BUDGET DEFICIT FINANCING BY GOVERNMENT SECURITIES ISSUES

In June the Ministry of Finance issued through auctions organized by the BNB two government securities issues under Regulation No. 5, including one short-term discount treasury bills issue (No. BG3010703000) and one medium-term (five-year) tap treasury bonds issue (No. BG2030003110). Government securities issued in June were tap treasury bonds opened again in this month.

At the auctions primary dealers' bids totaled BGN 69,080 thousand: BGN 19,630 thousand for three-month and BGN 49,450 thousand for five-year government securities (Chart 1). Approved bids totaled BGN 32,000 thousand nominal value, including three-month of BGN 12,000 thousand and five-year of BGN 20,000 thousand (Charts 2 and 3). Coverage coefficient of the issues approved for sale in June accounted for 2.16: 1.64 on three-month and 2.47 on five-year government securities (Chart 4). Reported excess of demand over supply was a result of stable investors' interest in government securities. Government securities issued in June decreased by BGN 49.9 million on a year earlier basis (Chart 2).

The yield of three-month treasury bills indicated a decrease of 0.4 base points compared with the previous month, reaching 2.52%. The yield of five-year treasury bonds slightly increased amounting to 5.53% (Charts 5, 6 and 8).

One 2002 treasury bills issue (BG3010702002), one 2003 treasury bills issue (BG3010303009) and one 1998 treasury bonds issue (BG2031198117) matured in June.

In the review period two issues of three-year treasury bonds earmarked for direct sale to individuals were put in circulation: issue No. 811 of 11 June 2003 and issue No. 812 of 25 June 2003. Issue No. 811 totaled BGN 480.4 thousand nominal value and issue No. 812 is still in circulation (Chart 11). Two 2001 issues, amounting to BGN 544.3 thousand, matured in June. During the period under review reverse repurchases accounted for BGN 220.1 thousand (Chart 12).

Notes:

Domestic debt based on cash flows.

The IMF extends its tranches to the central bank which then on-lends them to the government under Article 45 of the Law on the BNB. So far, the credits extended by the BNB to the MF are reported as domestic government debt to the BNB, on the one hand, and foreign liabilities of the BNB to the IMF, on the other hand.

In the BNB *Monthly Bulletin* debt to the IMF is included in the foreign debt structure and excluded from domestic debt structure in order to avoid any mistakes in using debt information.

The lev equivalent of the debt denominated in foreign currency is calculated on the basis of the exchange rate of the relevant currency against the lev at the end of month:

on 31 December 2002: USD 1/BGN 1.88496, EUR 1/BGN 1.95583.

on 30 June 2003: USD 1/BGN 1.71159, EUR 1/BGN 1.95583.

1. Foreign debt based on cash flows.
2. Credits in *Government investment loans* and *Government guaranteed debt* groups have been rearranged according to the provisions of the Law on the Government Debt (published in the State Gazette, issue 93 of 1 October 2002).
3. The IMF extends its tranches to the central bank which then on-lends them to the government under Article 45 of the Law on the BNB. So far, the credits extended to the MF by the BNB are reported as domestic government debt to the BNB, on the one hand, and foreign liabilities of the BNB to the IMF, on the other hand.
In the BNB *Monthly Bulletin* debt to the IMF is included in the foreign debt structure and excluded from domestic debt structure in order to avoid any mistakes in using debt information.
4. Debt recalculation in US dollars and in euro is based on BNB exchange rates of the relevant currencies against the Bulgarian lev valid for the last working day of the period.

Interest Rate Structure of the Foreign Debt as of 30 June

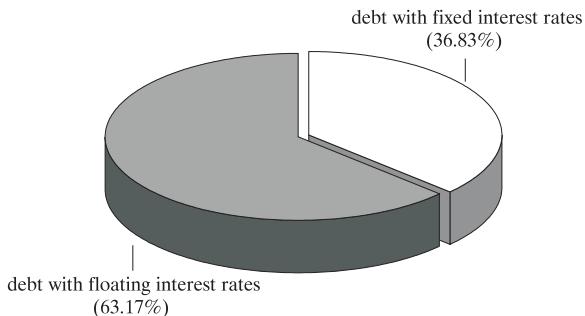

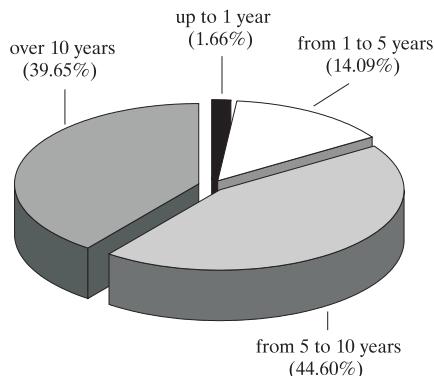

Chart 22

Residual Term to Maturity of the Foreign Debt as of 30 June

Note: The average-weighted residual term to maturity of the foreign debt is ten years and three months.

By end-June government and government guaranteed debt totaled EUR 8,878.5 million, including domestic debt of EUR 1,142.2 million and foreign debt of EUR 7,736.4 million. The increase in absolute terms was EUR 151.5 million on the previous month primarily due to foreign financing on government investment loans and USD/EUR exchange rate fluctuations.

By end-June the key macroeconomic indicator identifying the *debt to GDP ratio* was 49.2%, an increase of 0.8% on May 2003. The value of this indicator measured by *domestic debt to GDP ratio* and the *foreign debt to GDP ratio* accounted for 6.3% and 42.9% respectively.

Domestic debt occupied 12.9% in debt structure and foreign debt 87.1% (Chart 23). A slight decrease was reported in the share of domestic debt at the expense of the foreign debt compared with May (0.1 base points).

Forex debt composition experienced certain changes on the previous month. By end-June the share of the debt in US dollars stayed relatively high, amounting to 46.2%. In the review period debt in euro decreased from 32.6% to 32.1%, while debt in levs and other currencies slightly fluctuated (Chart 24).

Debt on other bonds (global bonds used to replace a portion of the Brady debt, and eurobonds) occupied the largest share in debt structure by type of creditor, 24.1%, followed by the debt to the London Club (Brady bonds), 24%, domestic debt (government securities), 12.9%, debt to the IMF, 10.7%, and debt to the World Bank, 10.3% (Chart 25). The share of domestic debt issues continued its upward trend in the period under review.

By end-June debt interest structure reflected a slight increase in the debt with floating interest, from 58.2% to 58.4%, over the debt with fixed interest which comprised 41.6% (Chart 26). Improvement in this proportion was one of the priorities of pursued debt policy intended to minimize interest risk effect and to ensure acceptable interest rate burden for the government debt.

Since early-2003 payments effected on government and government guaranteed debt have totaled BGN 1,266 million, including domestic debt payments of BGN 465.1 million and foreign debt payments of BGN 800.9 million (Chart 27). In June payments to the World Bank, the European Union and on government guaranteed loans comprised the most significant shares, while the main domestic debt repayments were effected on government securities issued for budget deficit financing.

By end-June payments in levs (BGN 465.1 million) accounted for the biggest share in the forex composition of debt payments followed by payments in US dollars (BGN 311.7 million) and in euro (BGN 293.1 million, Chart 28).
